PVCU INTERNAL DOORS

The In~Door Range

Welcome.

The in~door range of internal doors are manufactured from high impact resistant PVCu plastic skins, offering a virtually maintenance free door that requires no painting, just wipe it down to keep as beautiful as new.

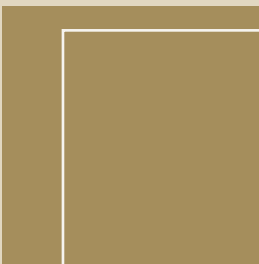

The In-door PVCu skins contain an anti-microbial, which is effective in reducing and preventing the growth of micro organisms on the door surface.

With a choice of styles, sizes and colours, there is a door to suit your taste and create the perfect addition to complement every room in your home.

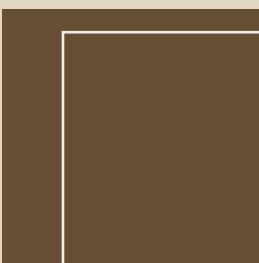

Each door has a robust medium density fibreboard sub frame to prevent warping and bowing. The ivory and white embossed wood grain texture gives an authentic appeal while the foiled oak finish offers a traditional look to complement any style of home.

Contents

Page	Description
2	Welcome & Contents
3	Dart
4-5	Welland & Tweed
6-7	Welland

In today's world, children will be children and internal doors do take a battering. The toughened safety glass meets all safety standards, so you can feel safe and secure in your home.

safety

Glazed doors also allow extra light into rooms, helping visibility and without the need for painting they are virtually maintenance free.
